

VersaScreen IceBlaster FE (HG-FEP)

The HG-FEP is a heated gutter guard system designed to work on most styles of gutters including K style and fascia style. It is specifically designed to prevent ice dam and icicle build up at the eaves and gutters. The highly efficient system is comprised of the VersaScreen Pro and the FE Cover along with two runs of the self regulating heat cable - one at the front edge and one in the gutter bottom. Installation is simple. Route heat cable in the gutter bottom, downspout and on top of the screen. Secure heat cable on top of the screen with FE Cover flashing. Expert design layout and installation guidance are available.

Specifications:

Performance:

- Two runs of industrial grade 13watt (nominal) per foot self regulating heat cable
- Screen and FE Cover Panel: .040 aluminum with a durable powder coat matte black finish

Warranty:

- 10 yr on VSP and FE
- 10 yr on supplied heat cable
- See Warranty for complete details

Supplied Components:

- VSP, FE (5' standard lengths)
- Mounting hardware
- C/US Listed self regulating 13w/ft heat cable
 - 110-130v or 208-277v (voltage specific)
- Power Connection Kit

NOTE:

Roof drip edge or gutter apron, ice/water shield, tarpaper, gutter straps, and other features omitted for clarity. VersaScreen and IceBlaster EMS products are fully compatible with most roof styles and systems. VersaScreen IceBlaster FE can be installed with additional heating options at the roof edge, including the IceBlaster EMS EP-SO and EP-SC.
